

What

Will You

Do?

What

will you do

in these cases

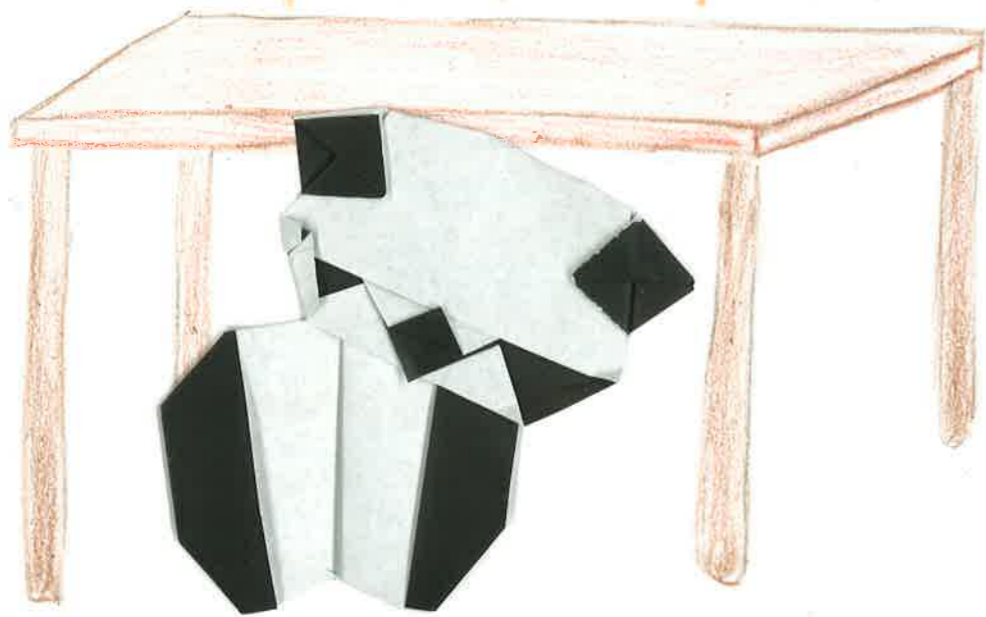

If an earthquake
breaks out,

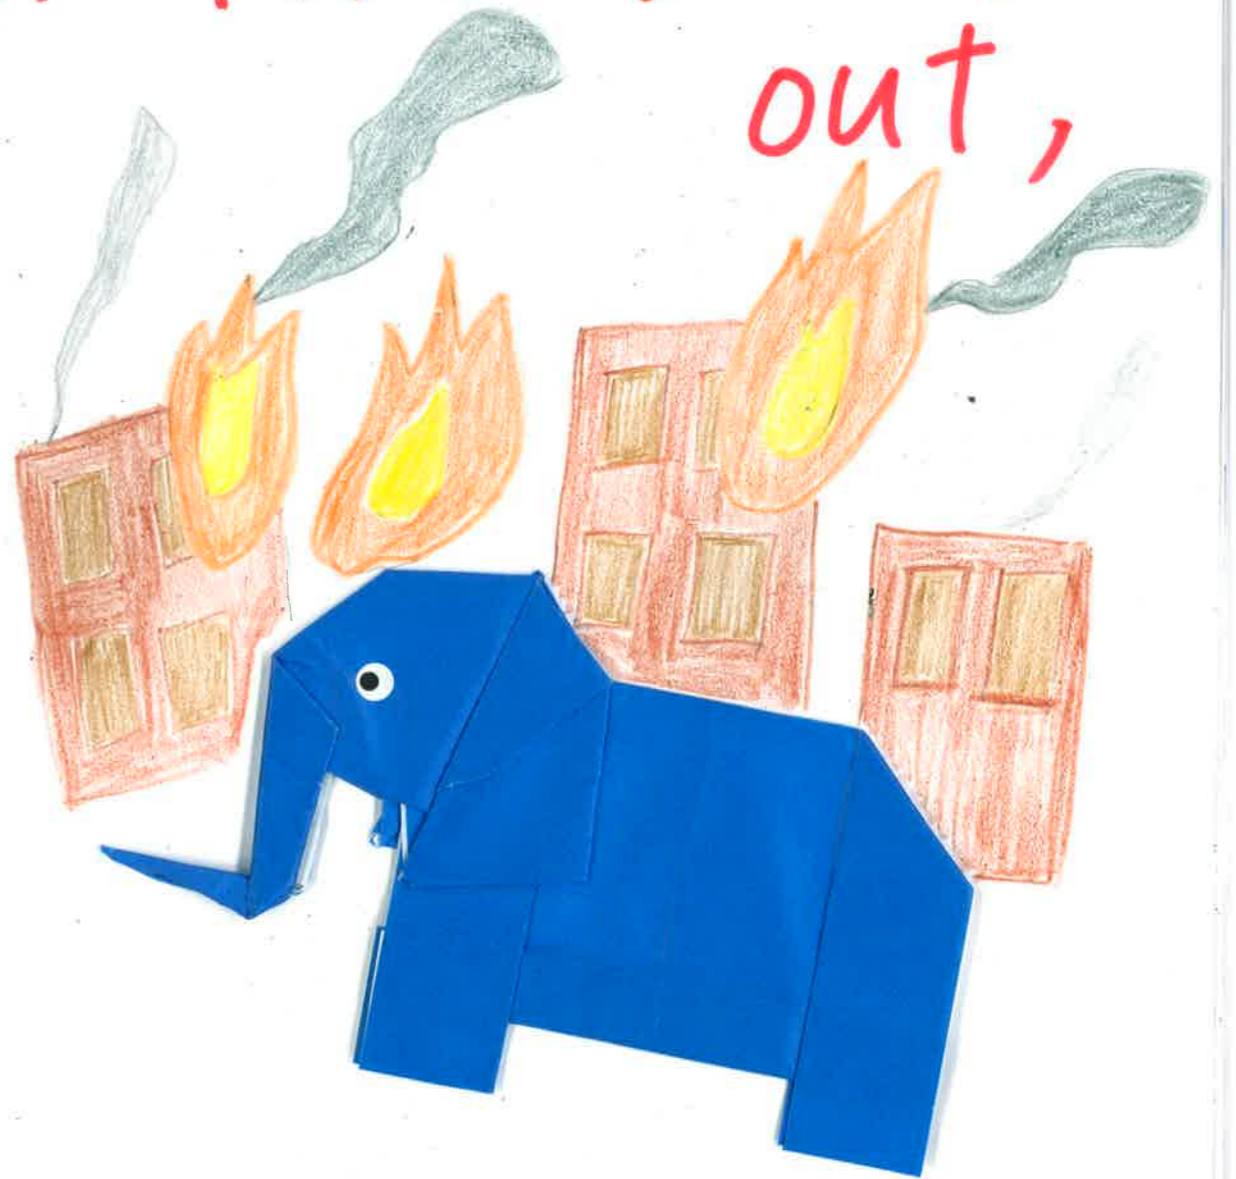

you'll have to hide
yourselves under the desk
or bed!

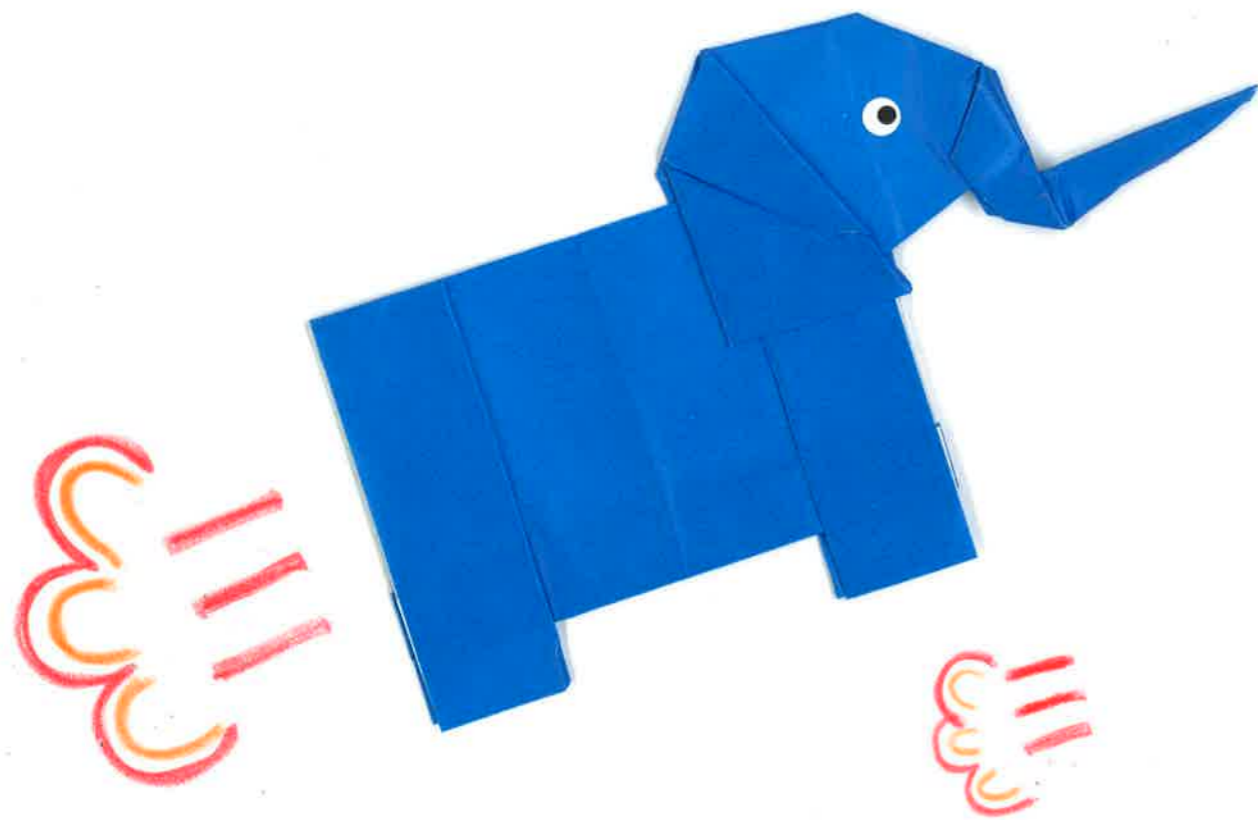

When you're in bed, you should
protect yourselves with the help
of futon or quilts, or pillow.

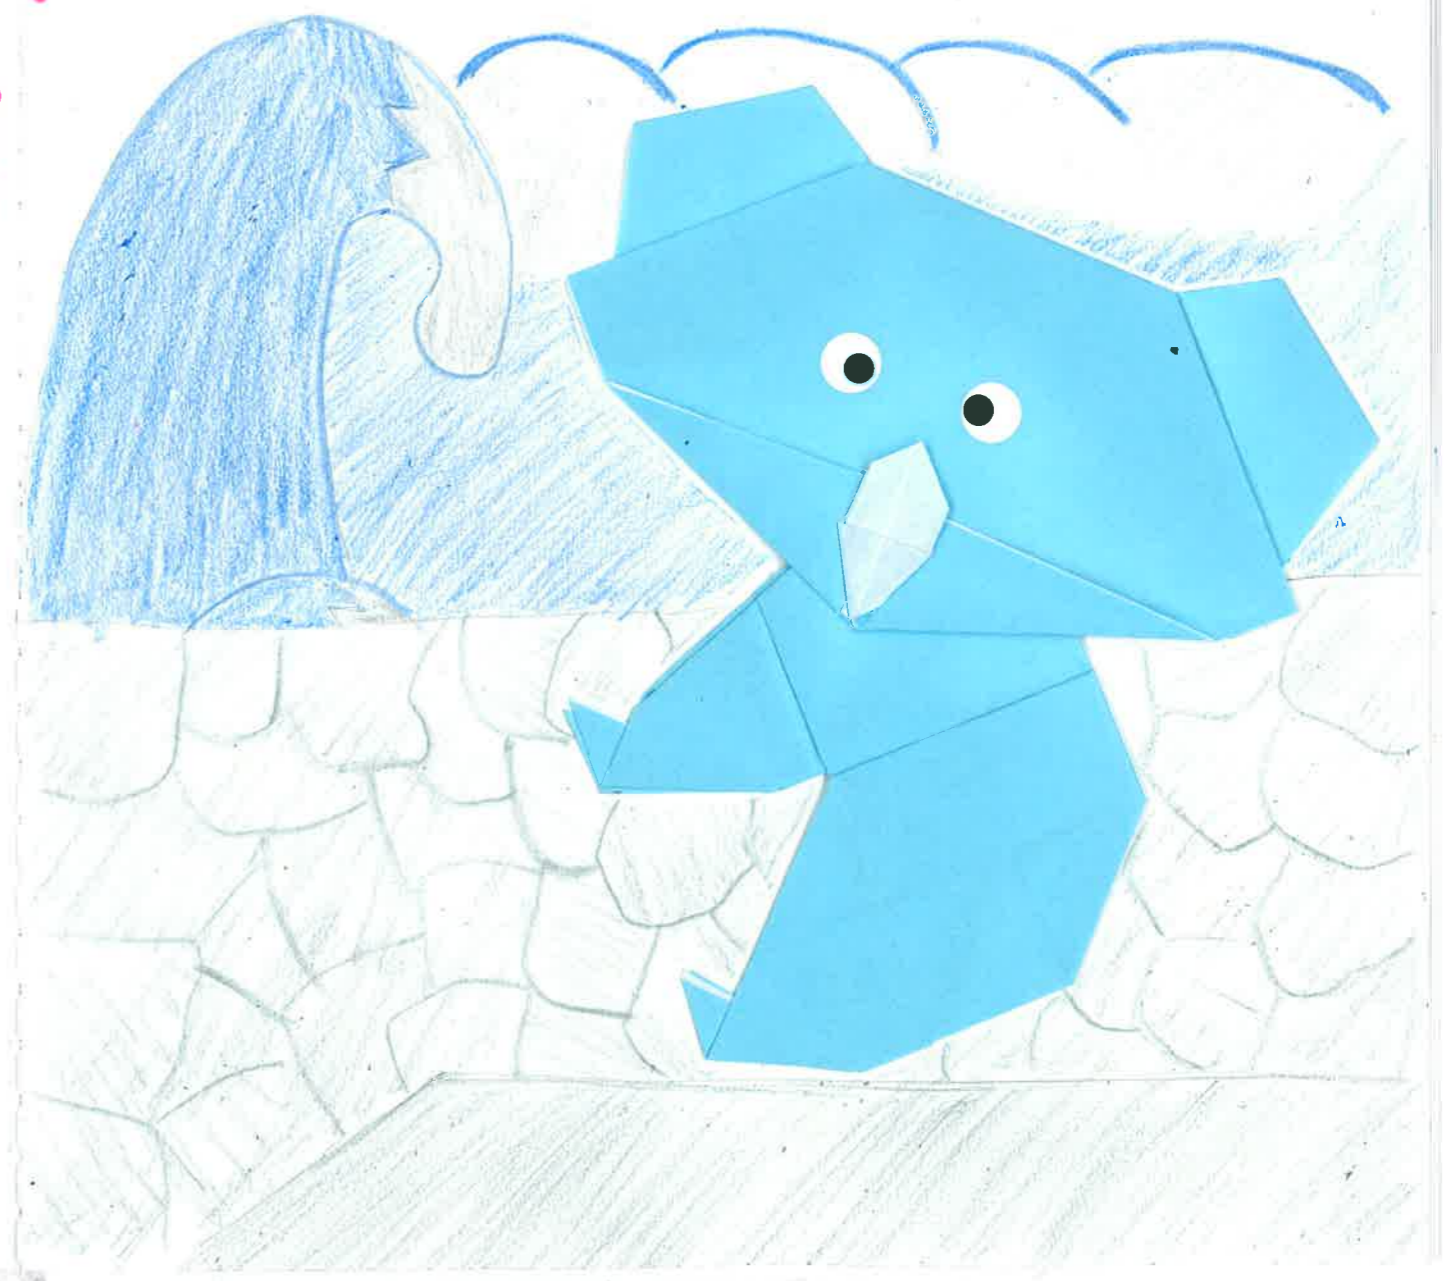

If a fire breaks
out,

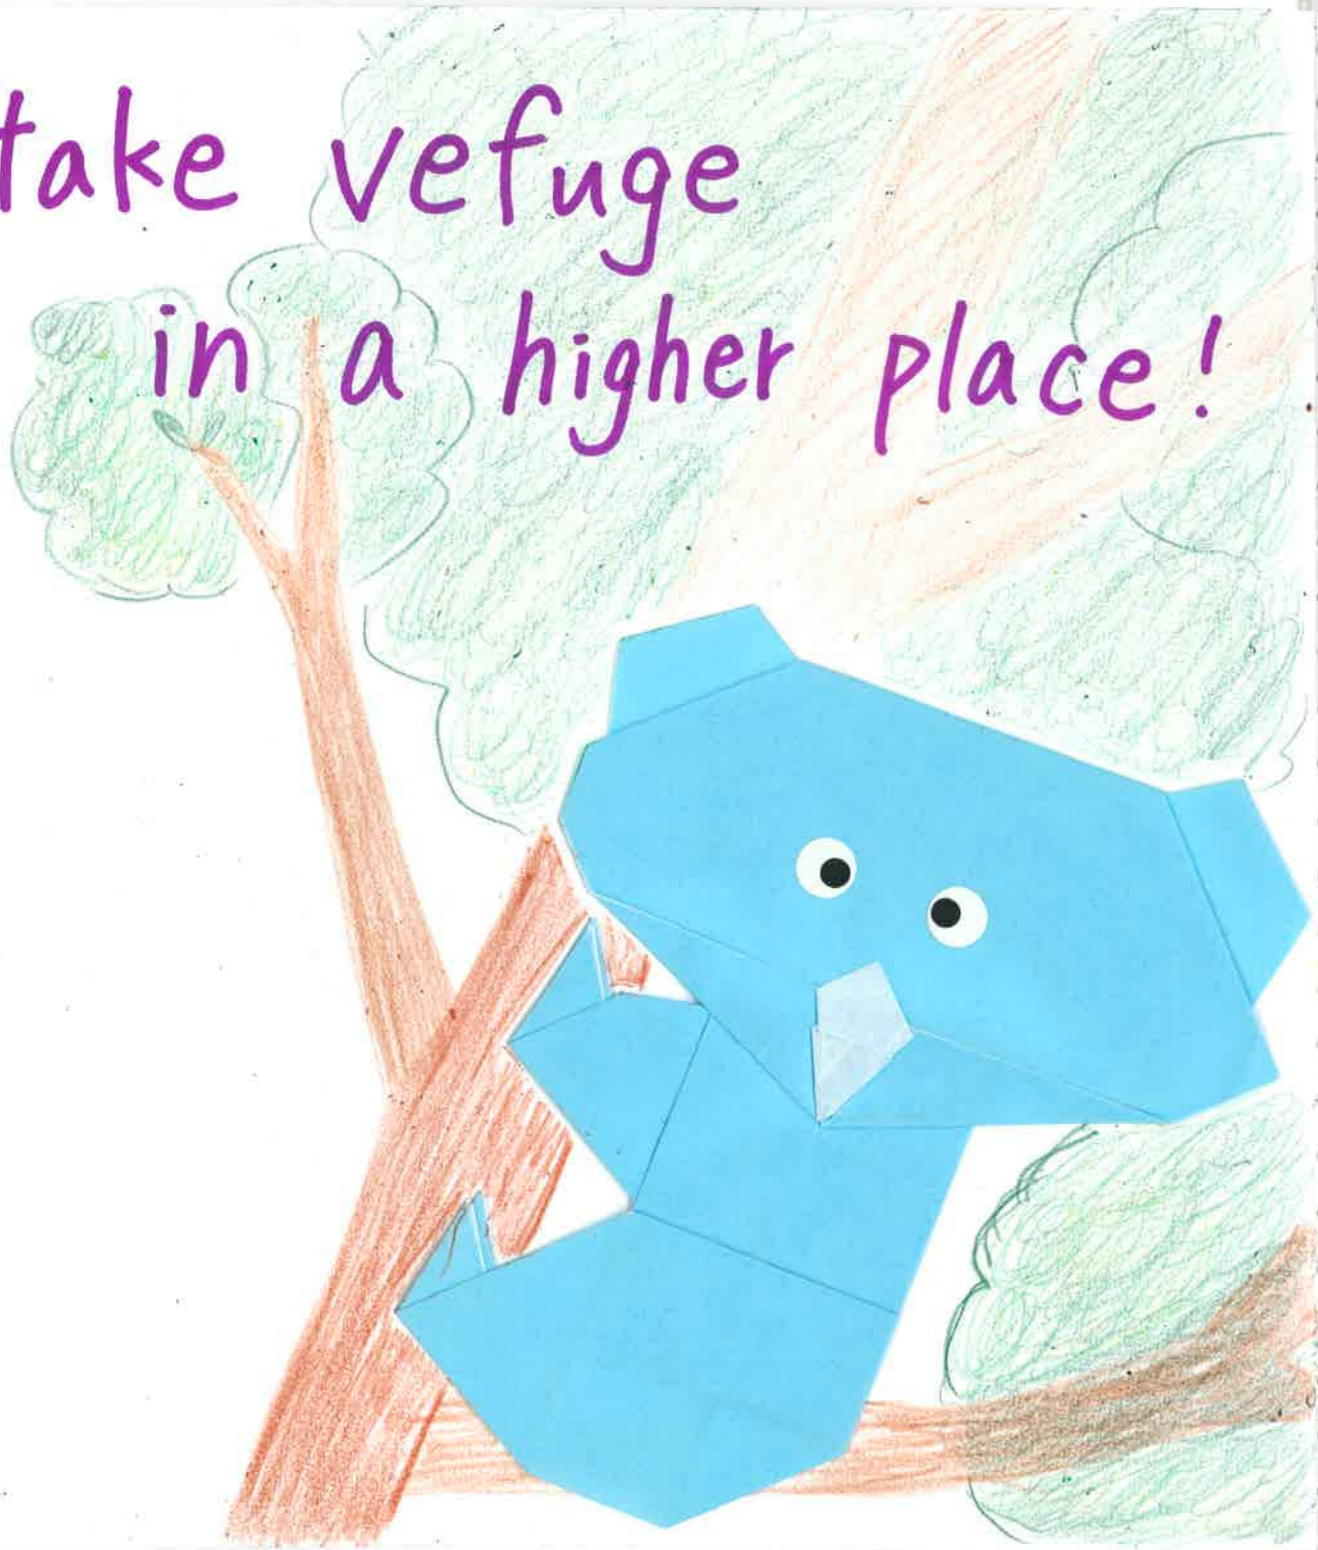

take a low position
and escape!

If Tunami happens,

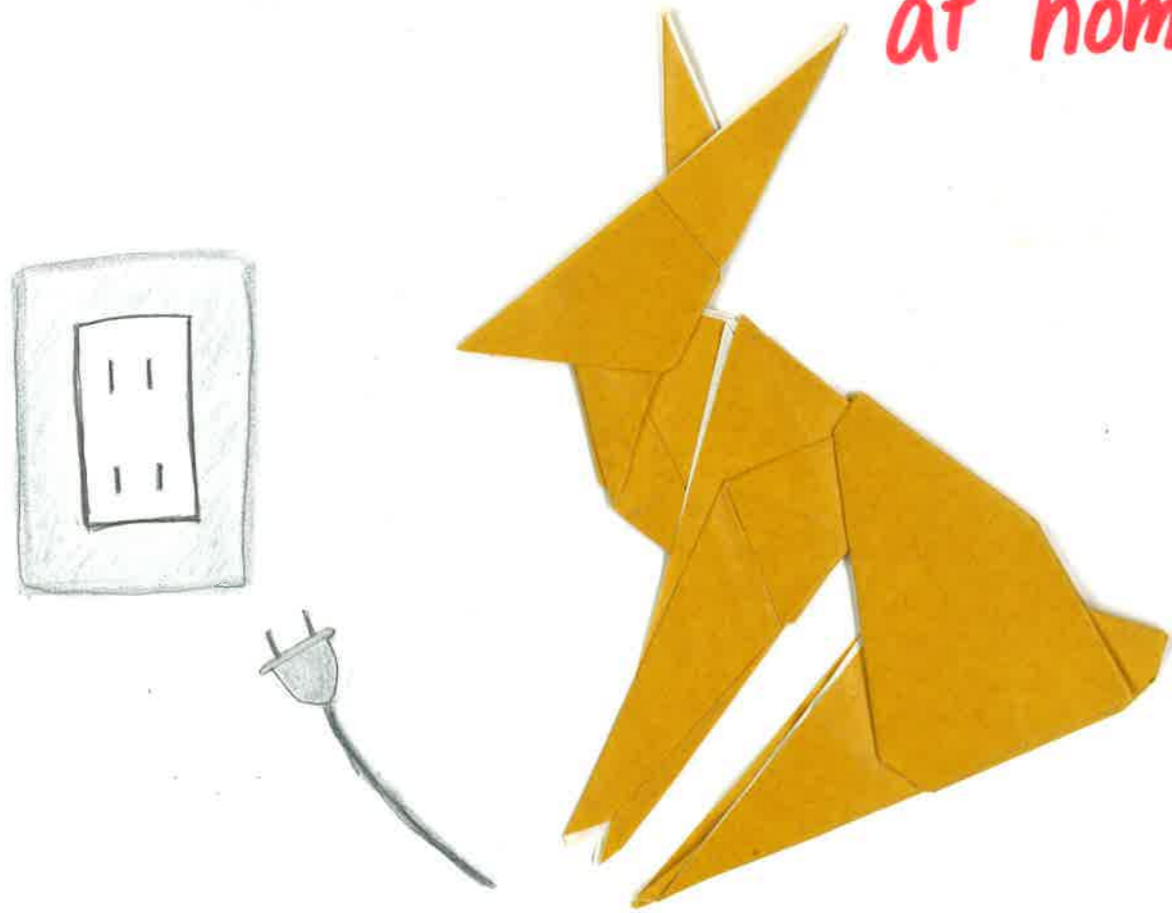

take refuge
in a higher place!

When a
thunder comes,

let's stay away from
high buildings, or pull out
plugs of electric appliances
at home.

Are 

 you

OK?

Thank you

for
